Last Week

The students were very hard workers last week. In math we worked on addition and different strategies for adding. We also worked on different number sequences. The students also enjoyed a fun game of Addition BINGO on Friday. In Social Studies we talked about the Colonial Days. We looked at how colonial schools were different than ours today. We also talked about Colonial Quilts and made our very own classroom colonial quilt. We also talked about how the pioneers had to make everything themselves. We talked about how there were no Wal-Marts and the pioneers had to make their own silverware. The students then made their own plate by using tin foil and engraving different designs in it.

This week in Math

This week we are going to continue working on addition. We are going to look at different ways to make five, six, nine, and ten. I am also going to show the students how to add using a number line. We are also going to be looking at some

story problems and thinking how we can solve them.

This Week in Social Studies

This week we are going to be talking about the pilgrims and the first Thanksgiving. We are also going to talk about why we celebrate Thanksgiving and why it is important. The students are going to be learning about the Mayflower and making their own Mayflower ships. The students are also going to be talking about things they are thankful for and making a collage to show these things.

Have a tremendous week!
